PROFESSIONAL SUMMARY

Software Engineer with 4+ years of remote experience building scalable applications for international clients. Specializing in React/Node.js ecosystems with a proven track record of delivering enterprise solutions that drive measurable business outcomes.

WORK EXPERIENCE

Ropstam Solutions Inc.

Jan. 2024 – Present

Software Engineer

Remote

- **Enterprise Management Platform:** Architected and developed a comprehensive C-level business management platform serving 500+ executives, utilizing React, Node.js, and MongoDB. Delivered features include project management, team oversight, KPI tracking, and financial performance analytics with real-time data visualization.
- **Subscription Management System:** Built an end-to-end subscription platform with React and Node.js, implementing secure authentication, role-based access control, and Stripe payment integration. Achieved 99.9% uptime and processed \$50K+ in monthly transactions.
- **Real Estate Application:** Enhanced Reventure app using React/Next.js and Python, integrating advanced mapping functionality and content management systems. Improved user engagement by 40% through optimized data engineering solutions.
- **Admin Dashboard Development:** Designed pixel-perfect parking platform admin panel with React and Sass, integrating multiple third-party APIs and reducing administrative processing time by 60%.

Spot N Paste LLC

Jan. 2022 – Dec. 2023

JavaScript Developer

Remote

- **Browser Extension Development:** Developed a productivity-focused browser extension using vanilla JavaScript, DOM APIs, and AJAX, serving 1,000+ drop-shipping professionals and reducing manual task completion time by 50%.
- **Client Collaboration:** Maintained direct client relationships throughout the development lifecycle, ensuring 100% requirement satisfaction and providing ongoing application support and maintenance.

WebNukes Software House

Jan. 2020 – Dec. 2021

Software Engineer

Bahawalpur, Pakistan

- **Full-Stack Development:** Led complete software development lifecycle, including dashboard creation, client consultation, quality assurance, and customer support for multiple web applications.
- **Cross-Functional Leadership:** Collaborated with design and product teams to deliver user-centric solutions while maintaining high code quality standards.

EDUCATION

The Islamia University of Bahawalpur

2019

Master's of Computer Science

Bahawalpur, Pakistan

- **Honors:** 3.3/4.0 GPA
- **Courses:** Data Structures & Algorithms, Operating Systems, Web Development, Statistics & Probability

CERTIFICATIONS & SKILLS

- **Certifications:** Front-end Development Libraries, Backend Development and APIs, JavaScript Algorithms and Data Structures, Cybersecurity (**CISCO**), Data Science (**CISCO**), Networking (**CISCO**), Data Fundamentals (**IBM**)
- **Skills:** JavaScript, TypeScript, Rust, Python, React/Next, React Native, Tailwind, MongoDB, MySQL, OOP, Networking, Data Science, Cybersecurity, Server-side, Asynchronous and Cloud Programming, Relational and Non-relational Databases, Figma, UI/UX designing, Jira, Slack, Github, BitBucket

SIDE PROJECTS

- **Invoice Management Web App**: Built a full-stack invoice management system with TypeScript, React, Remix, and SQLite, handling 100+ records and reducing processing time by 60%
- **Clientlane**: Developed a comprehensive client collaboration platform with branded portals, automated file organization, real-time project tracking, and enterprise-grade security, eliminating email chains and improving client communication efficiency by 80%
